

HERO Business Continuity Appliance (BCA)

Protect SBS 2008

Certified on the Microsoft® Windows Small Business Server (SBS) platform, HERO™ BCA provides far more efficient protection for your SBS environment than other competing solutions on the market. How? Quite simply; by using a unique, patented technology licensed from the industry leader, Double-Take Software, for asynchronous replication of data on a LAN/WAN. Working in real-time, HERO captures all modifications on the SBS server, at a byte level, and duplicates these changes onto the HERO Business Continuity Appliance. If you lose a file, simply drag and drop it back with a simple mouse click. In the event of a full-system failure the SBS server is automatically failed over to the HERO BCA and user activity can restart in a matter of minutes.

- The First & Only *affordable* appliance solution capable of providing continuous, Real-Time, whole server replication, with automatic failover for Microsoft Windows® Small Business Server (SBS).
- HEROguard™ Disaster Recovery Service provides replication across the cloud to our HERO Data Center for a redundant copy of your server & data.
- Create Point-in-Time Snapshots for system restoration to multiple points in time. Create retention policies for deleted data.
- Simple 20-minute set-up.

HEROguard™ Disaster Recovery Service creates a replica across the cloud to the HERO Data Center. System data is encrypted and stored in our Tier 3 state-of-the-art data center. The HERO data center is protected by 24x7x365 armed security and bio-scan entry systems. The data center is manned every hour of every day with a full Network Operations Center (NOC) staff. The NOC staff monitors all network activity to ensure continued operations and recoverability of your data should the need arise..

REAL-TIME BACKUP

HERO BCA 08 performs Real-Time continuous replication of the entire SBS 2008 server, creating an up-to-the-second copy of not only the data, but also the OS, Applications, System State, User Permissions, Registry and more.

INSTANT FAILOVER

If the SBS 2008 server goes down, HERO BCA can instantly take over. With all your real-time data and system information, HERO BCA continues normal business operations and keeps your company running.

TECHNICAL SPECS

OS Support	MS SBS 08
Form Factor	Cube Appliance
RAM Included	4GB
Internal Drives	1 Standard
Drive Capacity	1-3TB (RAID1/5)
Network Capacity	100/1000baseT
Support	M-F 8-5 PST
