

# Using Backup Tapes

This is your **Recovery Point...**

- A failure occurs at 3pm
- How old is my data? (*15 hours?*)
- Backups ran correctly? (*39 hours?*)

This is your **Recovery Time...**

- How Long until I fix the problem?
- How long until I can restore from tape or disk?
- How long until users are back on?

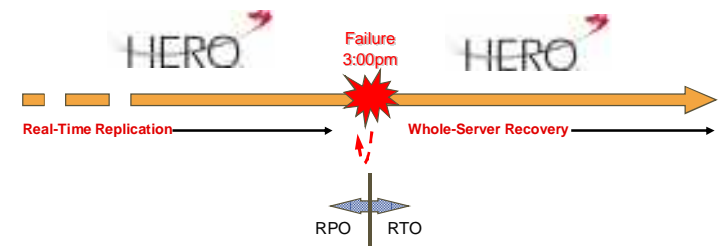

**40% of businesses will go out of business if they cannot get to their data and systems within 24 hours after a crisis.**

**-Gartner Group**

**Nearly 40% of all tape or disk backups are not recoverable in full and almost 60% fail completely.**

**-Gartner Group**

# HERO Recoverability

Downtime is reduced from **hours/days** to **seconds/minutes...**

- How old is my data? (*Seconds*)
- Microsoft Server fails over to HERO BCA? (*Minutes*)

HERO BCA provides a Real-Time, up-to-the-second copy of the Whole Server and the Critical Data...while providing fail-over protection in an outage.
